

WYOMING STORAGE TANK PROGRAM

Inter-Mountain Labs (IML) maintains A2LA accreditation under the Wyoming Storage Tank Program (STR) (previously know as the Leaking Underground Storage Program (LUST) for the benefit of our customers. Inter-Mountain Labs performs Diesel Range Organics (DRO) by EPA Method 8015, Gasoline Range Organics (GRO) by EPA Methods 8015 and 8260, and MTBE, BTEX, and Naphthalene by EPA Methods 8021 and 8260. In addition, IML performs Cadmium, Chromium, and Lead by EPA Method 6010 and Oxygenate analysis by EPA Method 8260. IML performs STR work on air, water, and soil samples.

Unbeatable Logistics

Lower your shipping costs. Use Inter-Mountain Labs as your analytical service provider. You will save money by not having to ship samples as “Overnight” or “Next Day”. Samples sent by “UPS Ground” in most of Wyoming will arrive the next day. Sample containers and coolers shipped to your location at no costs.

Competitive Pricing and Great Service

IML provides DRO/GRO/BTEX at the most competitive prices available. IML can provide 2 day rush work when a tank job or other need arises. IML is committed to providing value added service for our customers.

Data and Reporting

Lab reports available in Excel, pdf, DEQ format, and database formats. Customized reports prepared for your application. Data and reports available via web access.
