Inter-Mountain Labs (IML) is excited to offer conventional Oil & Gas related laboratory services, including WOGCC Appendix K analysis. We take pride in providing state-of-the-art accredited analytical chemistry and monitoring services that consistently satisfy critical regulatory review. IML is certified/accredited within numerous programs administered by the NELAC Institute, EPA, and A2LA and holds certifications in Wyoming, Nevada, Montana, Idaho, Oklahoma, South Dakota, North Dakota, Arizona, Texas, and Utah. Our scientists are trained in methodologies and quality assurance standards developed approved by EPA, A2LA, ISO, ASTM and multiple state agencies.

WOGCC Appendix K Groundwater Baseline Sampling, Analysis and Monitoring Program

- ◆ **Minimum Required Baseline Analysis - \$600**
 - ◆ Includes inorganic compounds, hydrocarbons and gases
- ◆ **Gas Compositional Analysis (GCA) - \$350**
 - ◆ GCA required if dissolved methane concentration > 5 mg/L.
 - ◆ Includes fixed gases C1-C6 and stable isotopic concentrations of carbon (^{12}C and ^{13}C) and hydrogen (^1H and ^2H) of methane
- ◆ **Additional Tools Available -**
 - ◆ Field documentation form
 - ◆ Data reporting in required EDD format

Pricing includes sample containers, COC's, and coolers shipped to client.
